# Brady Materials Are Made To Impress

## Brady labels last the longest, period.

Brady labels stick and stay stuck, plain and simple. In fact, some last up to 10 years outdoors\*. You only need to make them once. And after you make them, they're there for good.

## Options. Lots of options.

We make labels for specific applications. That's why we have hundreds of label types and sizes to choose from. We want you to be 100% confident that you have the right label for your exact application.

## We set the bar high.

There's a reason why Brady materials lead the industry in durability and performance. It's because we design and manufacture the labels ourselves. We put our materials through rigorous, painstaking tests and trials – and nothing leaves our doors until it passes with flying colours. We set the standards high – because we know it's the only way our materials can exceed your expectations.

## With label printing like this, the possibilities are endless.

\*Average expected outdoor life of product will depend on user definition of failure, climatic conditions, mounting techniques and material colour. The up to 8 to 10 year outdoor durability applies to the vinyl label stock only; ribbon durability will vary. A polyester overlaminates is recommended for harsh environments - long term exposure to wind and rain.

## Impressive material lineup

Depending on the customer's needs, the printers can be used with over 400 material parts in 30 different materials designed for:

- Multicolour safety identification signs
- Pipe markers
- 5S labels and general purpose die cut labels
- Production line facility labels

\*\*Average expected outdoor life of product will depend on user definition of failure, climatic conditions, mounting techniques and material colour. The up to 8 to 10 year outdoor durability applies to the vinyl label stock only; ribbon durability will vary. A polyester overlaminate is recommended for harsh environments - long term exposure to wind and rain.

Order references with "C" (e.g. M71C) indicate continuous. Order references beginning with "B" indicate bulk rolls.

### TRANSFER TAPE IS THE BEST WAY TO APPLY CUT-OUT SHAPES & TEXT!

1. Cut out your shape or text and weed away unneeded material
2. Apply transfer tape over your cut-out objects and press firmly
3. Peel back transfer tape which will lift and expose the adhesive side of your now pre-spaced objects
4. Position object in place and press firmly onto final surface
5. Peel back transfer tape at sharp angle to surface
6. Works great for cut-out text on rigid sign panels too.
